--DETAILED DESCRIPTION OF THE ILLUSTRATED EMBODIMENTS--

On page 15, at line 24, please insert the following:

Q6
104201-1000000
-- The foregoing is illustrative of the present invention and is not to be construed as limiting thereof. Although a few exemplary embodiments of this invention have been described, those skilled in the art will readily appreciate that many modifications are possible in the exemplary embodiments without materially departing from the novel teachings and advantages of this invention. Accordingly, all such modifications are intended to be included within the scope of this invention as defined in the claims. In the claims, means-plus-function clauses are intended to cover the structures described herein as performing the recited function and not only structural equivalents but also equivalent structures. Therefore, it is to be understood that the foregoing is illustrative of the present invention and is not to be construed as limited to the specific embodiments disclosed, and that modifications to the disclosed embodiments, as well as other embodiments, are intended to be included within the scope of the appended claims. The invention is defined by the following claims, with equivalents of the claims to be included therein.--

IN THE ABSTRACT:

Please replace the Abstract at page 21 with the following Abstract:

--A CLOSURE CASING

ABSTRACT OF THE DISCLOSURE

Q7
A closure casing has two co-operating closure members defining an enclosed space between them when in a juxtaposed closed position. A clamp is provided that holds the closure members together in the closed position, the clamp includes at least one over-centre or toggle clamp mechanism, one part of which passes through
